

May 14, 2020

Hello Everyone!

In addition to your regular daily menu of journaling, reading, and calculating, we have for your pleasure the opportunity to complete and construct a crossword puzzle a la Isabel *[link to child's video]*.

Did you know that at one time crossword puzzles were thought to dangerous? It was considered (at one time) that crossword puzzles were addictive and prevented people from properly using their intellects. Of course, at one time, people also felt this way about novels. Do you think they are dangerous? Here's a quick look into the invention of the crossword puzzle: https://youtu.be/rh_JBa1w-cM

And by the way, there are also crossword puzzle championships.

Have you ever heard of a Parabola? Aurora shows you how you can make one *[link to child's video]*.

And here is how you can find them in other places, including baseball playoffs: <https://youtu.be/RLwwDilauOg>

If you thought common denominators were a bit too common, we have for your jaded palate a sampling of most Uncommon Denominators: <https://youtu.be/cNpR0cxtv2A>

$$\frac{3}{4} + \frac{5}{8} =$$

$$\frac{7}{6} + \frac{3}{9} =$$

$$\frac{2}{5} + \frac{8}{10} =$$

$$\frac{4}{7} + \frac{5}{9} =$$

The weather has been becoming friendlier and friendlier. Here is a way you might journal your trips out into Nature, offered by Anna S.: <https://youtu.be/8ejlMDalOHk>

The conclusion to today's offerings is also the conclusion of dyeing with a drink mix: <https://youtu.be/bCNEbTJEI-g> and <https://youtu.be/37jQbGgJ714>

Bon appetit!

Nancy, Shanna, Anna and Anna
